DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Po et al [USPAT 5,268,978].

Po et al disclose an optical device comprising a linear array arranged on a substrate [see LED array 18], of adjacent surface emitting LEDs and a microoptics array 26s, arranged upstream of the LED linear array 18 on the emission side at a prescribed spacing, the emission of the individual LEDs is focused onto an optical unit 36, characterized in that

The linear array forms a monolithic unit, and the individual elements 26 of the microoptics array are arranged such that the light beams emitted by the elements 26s and traveling to the optics unit 36 [spherical lens] have different angles of inclination with regard to the longitudinal axis of the fiber 14.

The claimed limitations such as "...having optical functions....", and "...optimize the light power..." are considered to be an inherent feature of the device.

Examiner notes that the phrase "in particular" renders the claim indefinite since the resulting claim does not clearly set for the metes and bounds of the patent protection desired.
